

Proprietary cold rolled joists at 600mm centres (Same section as main universal beams, creating a flat soffit throughout)

Galvanised steel or white Plastisol-faced Vermiculux lined two-piece casements to exposed columns to give one hour fire protection

Two layers of 12.5mm Fireline board screwed to the underside of the cold rolled joists and deck beams
Fixed with all staggered joints between boards layers. Left un-taped/filled in accordance with SCI Guidance where a decorative ceiling is installed below

Should taping/filling be required, this is assumed to be by Main Contractor
